MEET YOUR MTT!

Attention, new battle droid units! You have been assigned to this Trade Federation MTT. Familiarize yourself with its functions and armaments and prepare for immediate transport into battle! ■

ROGER ROGER!

IN BATTLE, THE MTT ATTACKS WITH FOUR ROTATING BLASTER CANNONS CAPABLE OF RAPIDLY FIRING HIGH-ENERGY LASER BOLTS. YOU BATTLE DROID UNITS MUST TAKE GREAT CARE TO PROTECT ITS MORE VULNERABLE REAR SECTION FROM ATTACK BY CLONE TROOPERS, JEDI KNIGHTS AND OTHER REPUBLIC FORCES.

THE MTT (MULTI TROOP TRANSPORT) CARRIES AN ENTIRE LEGION OF BATTLE DROIDS LIKE YOURSELVES, FOLDED AND ATTACHED TO A STORAGE RACK FOR EFFICIENT TRANSPORT. ON THE BATTLEFIELD, THIS RACK IS EXTENDED THROUGH THE FRONT HATCH AND A SIGNAL IS SENT FROM AN ORBITING DROID CONTROL SHIP, COMMANDING THE DROIDS TO ACTIVATE, UNFOLD AND DEPLOY.

THE MTT'S FORWARD SECTION IS STRONGLY REINFORCED WITH HEAVY ARMOR PLATING, ALLOWING IT TO SMASH HOLES IN ENEMY BUILDINGS AND DEFENSES AND DEPLOY ITS BATTLE DROID TROOPS INSIDE. INNOVATIONS LIKE THESE WILL ALMOST CERTAINLY GUARANTEE US VICTORY IN THE CLONE WARS.

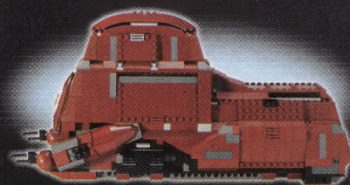

STAR WARS

BLUE-ARMORED BATTLE DROIDS LIKE THESE ARE DESIGNATED PILOT UNITS. THEY RECEIVE SPECIAL PROGRAMMING ENABLING THEM TO DRIVE ALL TRADE FEDERATION STARSHIPS AND VEHICLES. DO NOT INTERFERE WITH A PILOT DROID IN PURSUIT OF ITS DUTIES. DO NOT ASK A PILOT DROID IF YOU CAN HAVE THE NEXT TURN AT THE SHIP'S CONTROLS. PILOT DROIDS DO NOT HAVE A SENSE OF HUMOR.

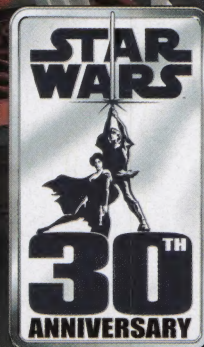

THE ORDERS OF A RED-ARMORED SECURITY BATTLE DROID SUPERCEDE ALL OTHERS. WHEN A SECURITY DROID GIVES YOU AN ORDER, YOU MUST IMMEDIATELY OBEY, NO MATTER THE DANGER TO YOUR CYBER-STRUCTURE. FAILURE WILL RESULT IN REPROGRAMMING OR RECYCLING.

YOU HAVE EACH BEEN ASSIGNED A BLASTER RIFLE, STORED ON A RECHARGING RACK INSIDE THE MTT. ENCODE IT TO YOUR INDIVIDUAL DROID PROTOCOLS AND KEEP IT WELL MAINTAINED.

THE MTT WAS MANUFACTURED BY OUR LOYAL ALLIES AT THE BAKTOID ARMOR WORKSHOP. IT STRETCHES 31 METERS LONG AND CAN TRAVEL UP TO 35 KILOMETERS PER HOUR WHILE HOVERING 4 METERS ABOVE THE GROUND ON ITS POWERFUL REPULSORLIFT ENGINES. WITH TECHNOLOGY THIS ADVANCED, THE TRADE FEDERATION WILL SOON REIGN SUPREME THROUGHOUT THE GALAXY!

LEGO® RACERS HIT THE STREETS!

The Tiny Turbos are tearing up the streets as they race for the finish line! Bridges, trucks, toll stations, nothing gets in their way as they skid, jump and crash through any obstacle!

STREET RACER SLANG!

Want to talk like a LEGO street racer? Here's some of their favorite expressions:

Hitting the Bricks: Crashing, usually into a wall.

Quick Clicks: Rebuilding your car after you crash, usually without instructions.

Bricking Your Ride: Building new features on to your racer.

MOC Around the Clock: Beating the best time ever on a course in a customized racer.

The racers are ready, engines hot, and then – hit the slammer and they're off! But just what does it take to be a LEGO street racer?

- Cool colors and detailing – show your opponents you're the toughest car on the course!
- Spoilers and tinted windows – handle any track, cut down on glare from high beams!
- Nerves of steel – When you tackle that curve at 110 miles per hour, you need a steady hand on the wheel! ■

MANUTRI BUILDING STEPS!

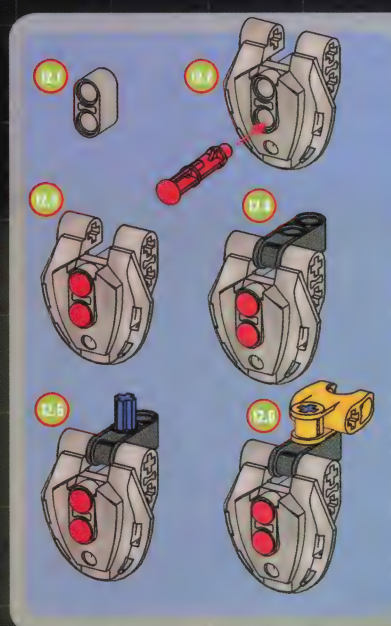

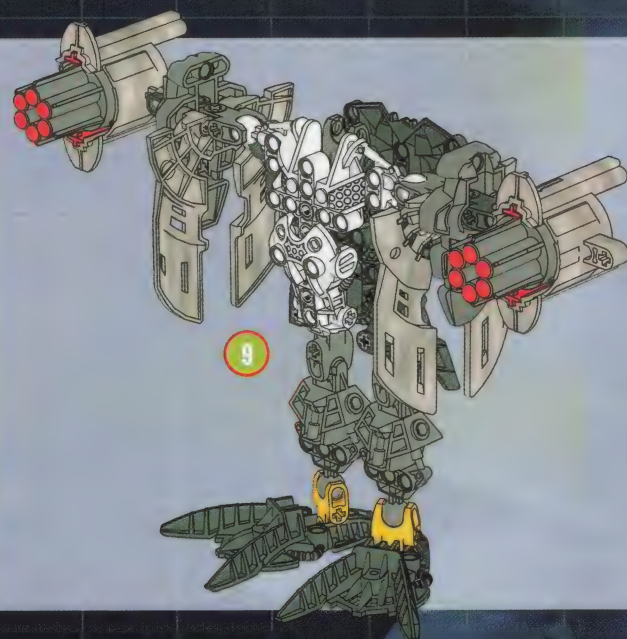

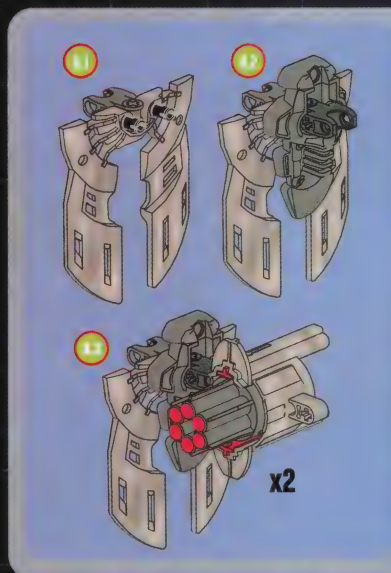

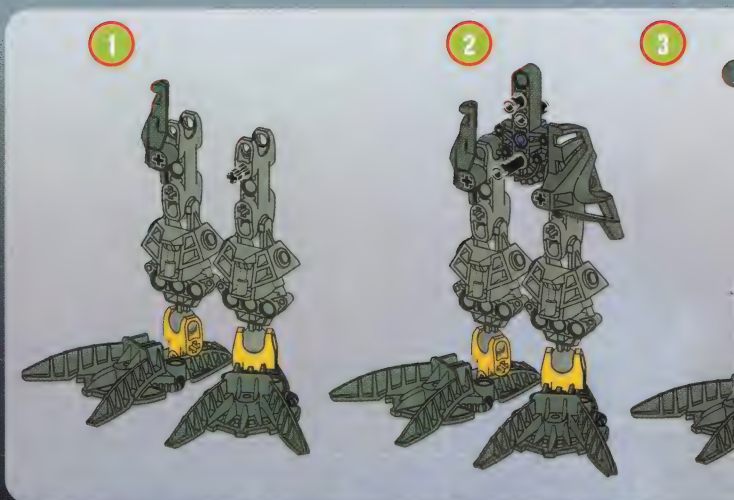

Designed by Daniel Lipkowitz

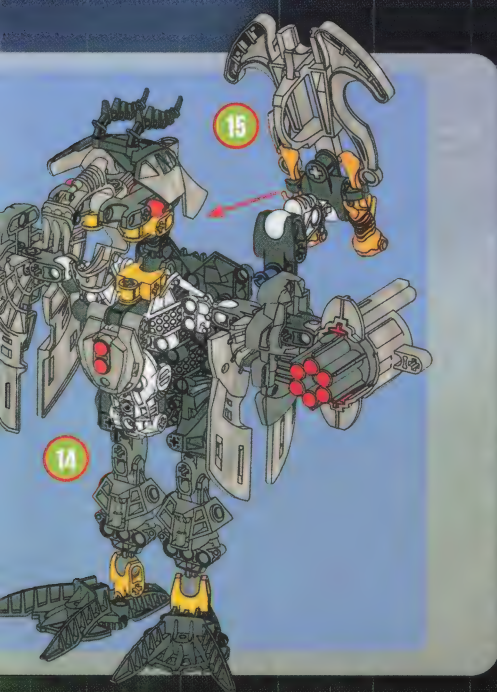

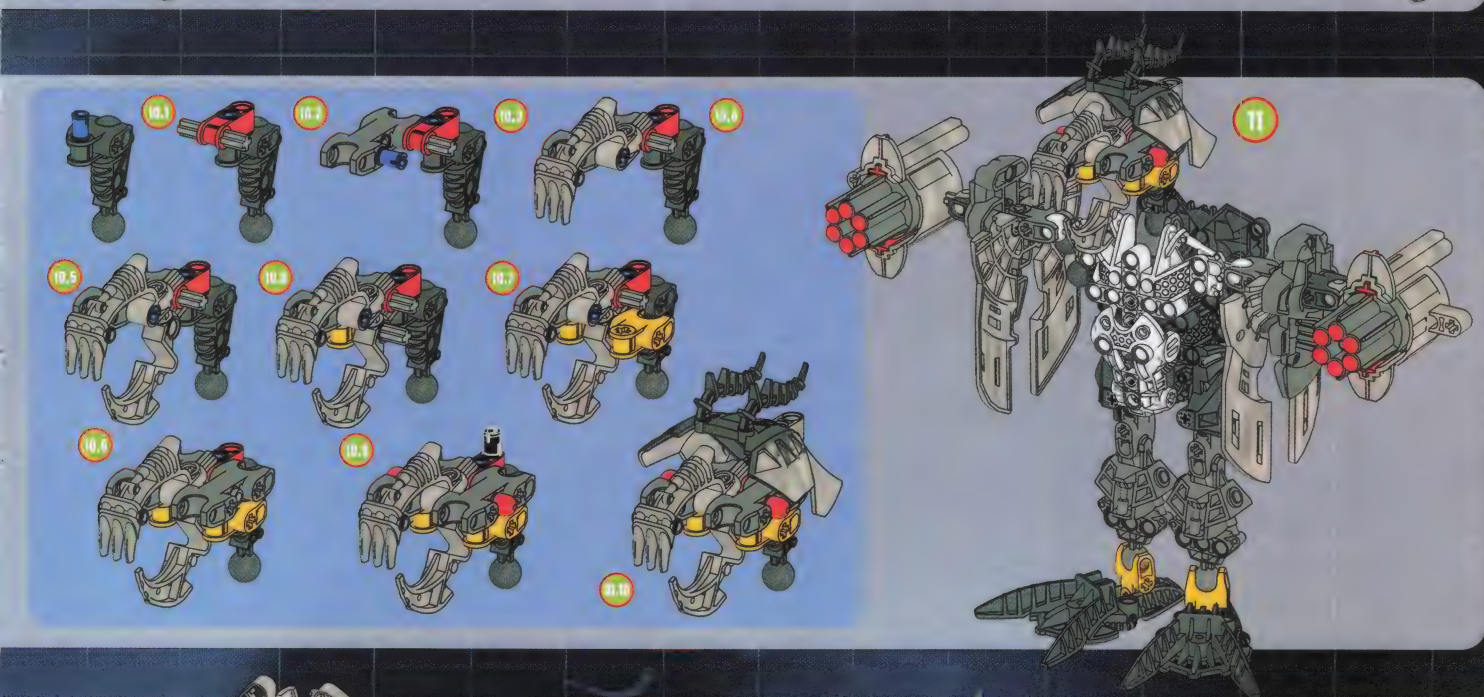

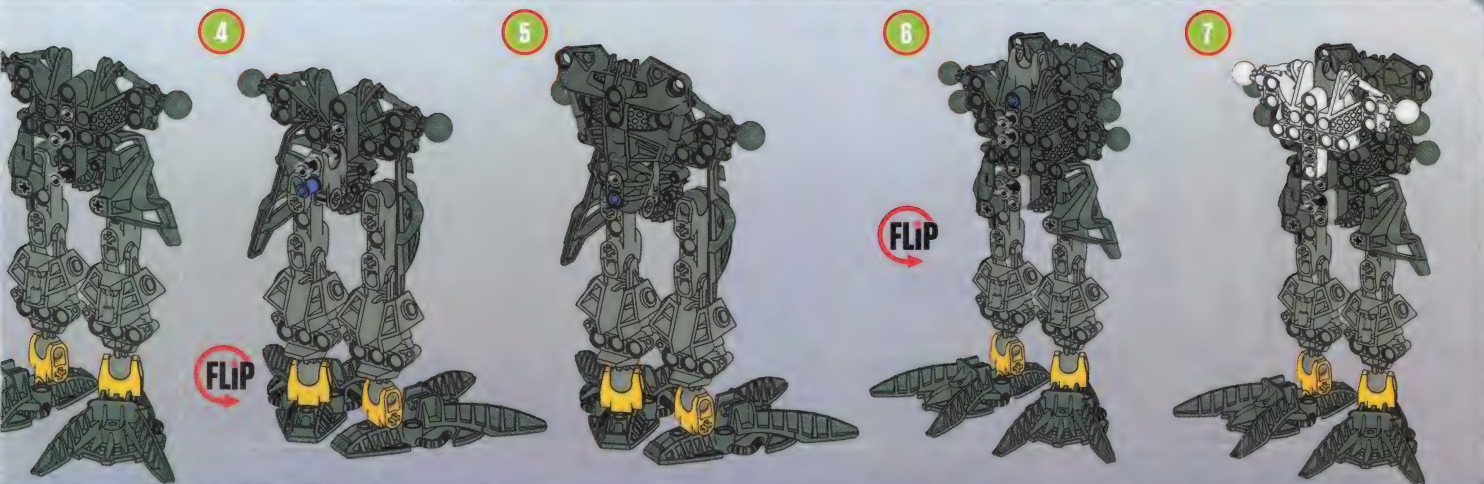

The Manutri are flightless birds who spend some of their time on the ice ring around Voya Nui, and most of the rest of it diving for prey in the cold sea. Altered and trained by Karzahni, they have been turned into a fighting force by him. He has outfitted them with squid launchers and Cordak blasters scavenged from the Barraki weapons caves and plans to unleash them on Toa and Barraki alike!

You can build a Manutri using pieces from 8913 Toa Mahri Nuparu, 8915 Toa Mahri Matoro, 8918 Carapar and 8919 Mantax.

CASTLE SIEGE!

The King's Castle is under siege! The Evil Wizard has summoned a great army of skeleton warriors and fire-breathing dragons to help him conquer the kingdom. Now it's up to the wise King and his brave knights to defend the mighty castle from all-out attack!

Main Catapult. A catapult is a medieval siege weapon that hurls heavy objects across great distances. It can be used to attack a castle by smashing its walls, or to defend it by knocking down enemy warriors and equipment.

Portcullis. The portcullis is a strong and heavy gate that protects the front door of the castle. It can be lifted or dropped by the guards inside, so even if enemies make it across the moat and drawbridge, they'll still have to find a way through.

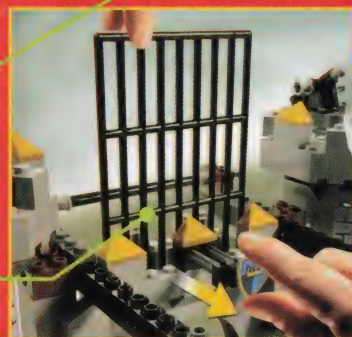

Secret Door. Castles always have secret doors and passages, and this one is no exception. In case the castle is ever captured, the king added a secret wall that can be used for a quick escape.

Back Gate. Here comes the cavalry! While the wizard gathers his forces at the front of the castle, the king's knights can ride out through the back gate, circle around the walls, and charge!

"Castles always have secret doors and passages, and this one is no exception."

"The King prides himself on the great size of his castle's courtyard..."

Castle Courtyard. The castle's courtyard is the open space inside its walls, where the knights can practice their fighting skills and hold great feasts and festivals to celebrate victories over the wizard's legions.

"The wizard has learned to control these legendary monsters with his magic staff..."

Drawbridge. The King's castle is surrounded by a deep moat that nothing can cross on foot. The defenders of the castle lower or raise the drawbridge to let friends across and to keep enemies out.

THE GOOD KING. The Good King is the wise and noble ruler of the kingdom. He has reigned for many years and all the villagers and townsfolk respect him.

THE LEAD KNIGHT. This fearless knight is the commander of all the king's forces. He has fought in more battles than he can count and always duels with honor.

THE KNIGHTS. The king's army includes archers, crossbowmen, royal guards and a legion of well-trained knights. They've sworn to defend the king and the castle against all attackers.

THE PRINCESS. The king's only daughter is beautiful, brave, and adventurous. When the wizard captured her, she escaped so many times that he had to lock her in the Skeleton Tower.

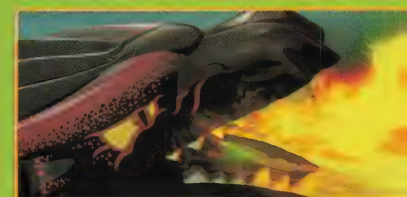

THE EVIL WIZARD. The Evil Wizard rules a barren wasteland from the top of his Skeleton Tower, where he plots to conquer the kingdom and take over the castle.

THE BLACK KNIGHT SKELETON. Clad in enchanted black armor, the Black Knight Skeleton leads the wizard's dark army across the kingdom. He will do anything to capture or destroy the Castle!

THE DRAGONS. The wizard has learned to control these legendary monsters with his magic staff. With their fire breath and powerful wings, they are the most dangerous part of the wizard's forces.

THE SKELETON WARRIORS. Summoned by the evil wizard's magic, the skeleton warriors and their bony steeds attack in great numbers to overwhelm their enemies.

LEGO® STAR WARS™ BUILDING STEPS! JEDI GLADIATOR

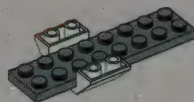

The Jedi Gladiator was an experimental one-man starfighter developed late in the Clone Wars. Piloted by a trained Jedi Knight, it could reach extremely high attack speeds thanks to its triple-engine design, and its defense shield and forward-mounted turbolaser cannons quickly earned it a formidable reputation among Separatist forces. It was only a direct order from Supreme Chancellor Palpatine himself, citing the starfighter's high cost, that kept the Jedi Gladiator from seeing mass-production.

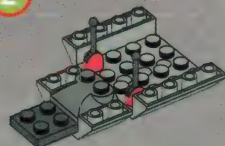

Build the Jedi Gladiator using pieces from 7660 Naboo N-1 Starfighter™ and Vulture Droid™ and 7661 Jedi starfighter™ with Hyperdrive Booster Ring!
